| • Web Optimization | • PHP | • Express.js | • PhpMyAdmin |
| • SEO | • SASS | • MySQL | • GitHub |
| • HTML5 | • JQuery | • MariaDB | |

PROFESSIONAL EXPERIENCE

Fundación Conciencia Activa CONACTIC Ibagué

January 2021 – August 2021

Software Developer

At Fundación Conciencia Activa CONACTIC I worked under an internship contract, for the development of the Interpretikz software, designed the graphic interface of the software for Windows and Android platforms using Photoshop, modeled and developed the database required by the software using MySQL, developed the views and functionalities of the software with multiplatform support, through Kivy, guaranteeing excellent data processing.

Achievements:

- I managed to optimize software development times by modularizing and simplifying the software source code.
- I complied 100% with the delivery dates of software advances.

Graphic designer

At Avisos Honda I worked on the design of sketches for products such as Banners, based on the client's requirements, digitally graphed the sketches with Photoshop and offered customer service taking into account their needs and requirements to translate their ideas into products.

Achievements:

- I contributed creativity and innovation to the original ideas of the clients, managing to maintain the satisfaction of the products offered.
-
